

Use-Case Flow Specification

Use Case ID: UC-03 **Use Case Name:** Make Milestone Payment

Primary Actor: Client Buyer **Supporting Actor:** Payment Gateway

Preconditions

1. The client has an active art commission.
2. A milestone payment is pending.
3. The client is logged into the portal.
4. A supported payment method is available.

Postconditions

Success: The payment is recorded, the milestone is marked as paid, and the final high-resolution artwork becomes eligible for release/download.

Failure: The milestone remains unpaid and the client is informed that the payment failed.

Main Success Scenario

1. Client Buyer opens the commission project.
2. System displays the pending milestone payment.
3. Client Buyer selects a payment method.
4. Client Buyer submits the payment.
5. System sends the transaction request to the Payment Gateway.
6. Payment Gateway authorizes the payment.
7. System records the successful payment.
8. System marks the milestone as paid.
9. System unlocks access to the final high-resolution artwork.
10. System displays a payment confirmation to the client.

Alternate Flow — Payment Declined

- 5a. Payment Gateway rejects the transaction.
 - 5a1. System displays a payment failure message.
 - 5a2. System keeps the milestone status as unpaid.
 - 5a3. Client is prompted to retry using another payment method.
 - 5a4. Client selects another payment method and retries.
 - 5a5. If the second attempt succeeds, the flow continues from Step 7.
 - 5a6. If the second attempt fails, the payment process ends and the client is notified.
